¹To take any course in which you use a computer, you should be able to type 20 words per minute and be proficient using a mouse or have successfully completed AST 117 or equivalent.

²Because computer science, electronics, and information technology are so rapidly changing, CS, ETR, and IT courses must have been completed within five years of registering for the subsequent course. This requirement may be met by successfully completing an approved CS, ETR, or IT course, transferring an approved comparable course, or by achieving a passing score on a credit-by-exam.

³Because this program is less than 16 credit hours, program participants will not qualify for financial aid.

⁴ARC 121 may be waived if the student demonstrates sufficient knowledge of architectural drafting by showing previous architectural course work or work experience to the Drafting program coordinator or to the Dean of Business and Technologies Division. The total credits required will be adjusted accordingly.
